Why Evokit sliding door system

This cavity door system is the perfect solution for all the DIY lovers: with few simple steps Evokit allows you to insert a door into the wall cavity without having a pocket system. You will save about 1 m² surface among the classical swing door.

The structure is composed of a metal frame, 6 horizontal strong bars 0.7 mm thick on each side and a rail that can bear up to 100 Kg. The horizontal profiles and the vertical ones are 1.2 mm thick.

Extractible rail

An innovative extractible rail allows accessories installation and easy maintenance. This is a brand new feature for Ermetika's Evokit.

Structural strength

The horizontal reinforcements guarantee structural strength: their shape is studied in order to be stable and solid against the plasterboard push.

Absolute firmness

Stronger metal door jamb reinforcements (1.2 mm thick) guarantee firmness in one of the critical points of a cavity sliding door system.

Adjustable 100/125

Evokit systems can be adjusted for 100 and 125 finished wall size in few steps.

Perfect integration

The fixing points of the system to the metal structure allow the perfect integration and a quicker set up.

Stunning aesthetical result

The anodised steel crossbar with special "save-design" lips shows only the best of the product, obtaining the best aesthetical result.

Silent and fluid sliding

The nylon "easy roll" track kit guarantees silent, long-lasting, fluid sliding motion. They can support up to 100Kg and their wheels run on sealed for life ball bearings.

Easy set up

The floor guide eases the setting up of the sliding system assuring that the door is true within the cavity.

Logistics

The kit can be supplied already mounted or dismantled and stored in the showrooms and ware houses saving floor area. In the latter case the handling and the transport is more convenient.

Evokit

ITEM CODE: EKSC

SINGLE DOOR
PLASTERBOARD

* 90 for finished wall 100-125
* * THE DOOR CAN ENTER COMPLETELY INSIDE THE POCKET
For safety reasons we recommend you to keep the handle out of the pocket.

ADVANTAGES

- Save floor area, in stock as well as shipping
- Easy and quick set-up and installation
- Aluminium extractable rail (max PW=1000 - metric size)
- Stronger metal structure
- 1 kit for both wall thickness (100/125)
- Structural strength and absolute firmness

ACCESSORIES

- Easy-Stop (Softclose)
- Sliding kit for glass door
- Simultaneous opening
- 120 kg track kit
- Under door profile
- Doorjamb and architraves
